

Camino Korčula is a 157-kilometre island route that follows the existing network of hiking trails.

The route's starting point is located within the medieval walls of Korčula, with the first seal in the Church of Our Lady, next to the Cathedral of St. Mark.

A tour of the Korčula route is recommended for a stay of 7 days or more to experience the unique features of the island's places and cultural, sacral and natural heritage.

To make it easier to navigate the island, the Camino Korčula is marked with recognizable blue-yellow signs.

Pilgrims who complete the Camino Korčula route will receive a pilgrim certificate or Compostela (available at the Korčula Tourist Office or Vela Luka Tourist Office).

Obtain a pilgrim passport or Credential del Peregrino online: <https://crocaminoshop.com/>.

The pilgrim passport is an official document of the completed pilgrimage, which records the stamps or credentials of the places (and landmarks) through which the Camino Korčula route passes, which are placed in customized and always accessible marked metal boxes along the route.

The stamps are not souvenirs, so please leave them for the pilgrims who come after you.
