Okolo

The Okolo collection combines airy elegance and minimalist design. Featuring a floor lamp, table lamp, two wall-mounted options, and pendant lamps in two sizes, this cohesive series plays with lightness and structure.

In each version, a translucent textile shade encases a glass diffuser, supported by sleek aluminium strips. Inspired by movement and form, Okolo's seamless design creates a floating effect, blending pure functionality with weightless beauty and refinement.

Onda

Inspired by the classic lightbulb, the Onda pendant lamp blends elegance with simplicity. Crafted entirely from hand-blown glass, its gradient-coloured, carefully hand-coated surface transitions from deep hues on top to a soft white base.

When off, Onda reflects its surroundings and blends seamlessly into any environment; when turned on, Onda radiates a rich, focused glow. Available in a range of colours, each lamp offers a unique ambiance, making it ideal as either a stand-alone fixture or as part of creative clusters.

Igram

Igram, meaning “playing” in Croatian, is the word that best describes the process of creating this unique collection. Silent by stature and nature, Igram is an interplay of ambiance and function.

The most emblematic piece for the entire collection is the Igram Wall Lamp, a versatile lighting fixture with a strong yet unobtrusive graphic presence. The collection further plays with a unique multipurpose product Igram Lamp + Table, a floor lamp combined with a metal construction and various handcrafted tabletops.

Inspired by the minimalism of Igram collection, the Portable Table Lamp was expressly designed to provide unparalleled lighting performance and visual elegance for tables seating up to four diners, indoors and outdoors. The design comes in two slightly different variants, shape I and J, meant to provide subtle visual variety and a sense of rhythm.

Arigato

The idea behind our Arigato lamp collection was to present a stylized everyday object inspired by the shape of a person bowing, a universally recognized gesture used to express gratitude and greetings. Its adjustability and applicability ensure a beautiful performance in various spaces and contexts. The mobility of the shade and the arms of the lamp enables the projection of the light in every direction.

The collection is composed of table, floor, wall, pendant and ceiling models that come with a handmade steel body and aluminium shade. Red, blue and green matte colours have been added to the existing colour range of black, white and raw.

Along with a 22 cm diameter lampshade throughout the collection, ceiling, wall and pendant versions are also available with 45 cm lampshades.

Ili Ili is something of a toy for grown-ups that invites you to combine various forms and colours into your own personalised lamp. It is lightweight, simple, and extremely versatile, a collection of modular pendant lamps composed of six different handcrafted aluminium elements.

Coming in various shades of matte colours and different cable colours, the final combination of elements is determined by the user. By playing with the design through the online configurator, the customer builds their own lamp and creates a relationship with it even before it arrives at their home.

Ili Ili Custom Ili Ili Combinations

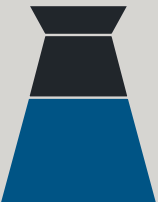

Coney Cone

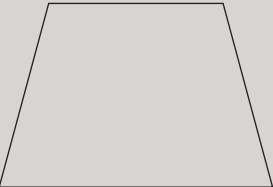

Do you want to go a colourful or monochromatic way? You'd prefer a big, four-piece combination or a simple lamp with just one piece? Do you want that element upside down? The combinations and possibilities are almost limitless. And they all look amazing. So, let's play.

Characteristics:  
Aluminium lampshade is press spun by hand. Powder coated in different matte shades. Plastic ceiling cup is included for pendant lamps. Wall lamps include rotating arm, removable cord and On/Off switch on the lamp base. Installation ceiling hardwiring, for wall lamps hardwiring or plug-in.

Baluna

Designing Baluna, we aimed to design light itself; the way it occupies space and affects mood. Every segment of Baluna has passed through the hands of master craftsmen who have shaped and painted the tubing and the shades, and handblown the glass. Their skilful eyes and expert touch guarantee the quality of each and every lamp. The collection is available with optional dimmer that enables maximum control over the light intensity. Finally, the triple coated satin glass opal diffuser, which can rotate around its axis infinitely, provides fine control over the ambient light.

All the functional parts, including the power switch, dimmer, power cord and powder coated tightening rings, have been custom designed to fit seamlessly into the form of the lamp. Apart from floor, table, wall, ceiling and pendant models, the Baluna collection is completed with two versions of chandeliers, the only products of this type and size offered by Grupa.

Model

Model is essentially a replication of a playful sketch in space, yet, in a way it was born out of consideration of the very material and an extreme reduction of elements from which a given object is made. Free from complications and with a “not yet finished” look, Model is a unique floor lamp.

The final design is left to the customer and it depends on the choices provided by Grupa. To finish a Model, one has to choose from three different sets of steel frames in a black or white finish and various possibilities in the colour of the textile cord. Model comes with a lightbulb selected by Grupa, however, everyone is free to experiment.

Dot

Dot is a collection of side tables that come in two dimensions and different colours, designed to follow the style and the thought of Grupa's lighting fixtures. The metal under-structure provides the strength and character which changes slightly depending on which side you look at it from.

Whether as a standalone piece or a combination of two given dimensions of these side tables, Dot is always working for the space it is in. It is made of durable and lightweight materials, steel frame with aluminium top, so it can work both indoors or outdoors.
